RESEARCH-BASED COMPOSITION

Three defined bacterial strains providing 1 billion CFUs of freeze-dried bacteria per sachet

Bb-02 *Bifidobacterium infantis*

BB-12[®] *Bifidobacterium lactis*

TH-4[®] *Streptococcus thermophilus*

✓ Randomised Controlled Trials and real-world experience

✓ Strains recommended in ESPGHAN position paper*

✓ No production of D-lactate

* Probiotics and Preterm Infants. A Position Paper by the ESPGHAN Committee on Nutrition and the ESPGHAN Working Group for Probiotics and Prebiotics. Journal of Pediatric Gastroenterology and Nutrition. February 2020.

QUALITY & SAFETY

✓ Strain quality

 Defined strain identity

 Low MIC-values

 No transferable antibiotic-resistant genes (plasmids)

✓ Product safety

 Expanded contaminant testing

 Two-year stability at room temperature

 Minimised handling prior to use, lowering contamination risks

 Manufactured in Europe under GMP standards and HACCP principles

PRACTICAL IMPLEMENTATION & SUPPORT

 Individually packaged single-portion sachets

 Easy to handle and administer

 Stored in room temperature

 Dedicated expert support

 Access to shared knowledge and educational resources
